Weight	35g / 1.23oz
Cycle Life	1,000+
Charge Input Voltage	4.5 - 5.5V
Charge Input Current	10 - 500mA
Capacity	750 mAh

BENEFITS

- **Useful** - One Powerstick charges all your mobile devices, reducing the need for more than one charger.
- **Convenient** - Charge it by using any USB port including laptops, PCs, airplanes and new vehicles.
- **Small** - The size of a stick of gum, it fits easily in your pocket or purse and weighs only 40 grams.
- **Universal** - Can be charged from any USB port anywhere in the world.
- **Safe** - Controls energy flow to your device, reducing overall energy consumption and risk for your device.

100% EFFICIENCY IS 100% ENVIRONMENTALLY SOUND

- Fact** - 1 Billion chargers are sold globally each year. Placed end to end, they could circle our planet 18 times.
 - Help reduce waste and replace those numerous chargers with one Powerstick.
- Fact** - Wall chargers use power when they are plugged into the socket but finished charging your device.
 - Powerstick doesn't consume energy from the USB once full. Automatic sleep mode feature helps conserve energy.
